

NATIONAL EDUCATION ASSOCIATION

Critical Issues Seminar

Each year, NEA National Center for Innovation sponsors a "Critical Issues Seminar" that brings together local leaders and national experts to discuss emerging issues in higher education. The seminar is used to test ideas and speakers for the national conference, to assist NEA with policy development in higher education, and to acquaint local leaders with the national program. Topics have included: accreditation, quality teaching and learning, peer evaluation, temporary faculty, distance education, and mentoring programs.
